Just what point in the canyon he reached Mr. Newton did not state, preferring to keep the location to himself. But he says that valuable mines are located at this point, and what is of more interest to our readers is that these claims will be worked, and before another year passes by a couple of hundred men will be at work in the proposed new camp.

The building and loan associations of Tucson have been of great financial assistance to the people thereof. They have given Tucson citizens capital to build and improve their homes when it could not be had elsewhere. They gave scores of families the means of securing homes. Then began the building of good cottages and residences in the city, which gave a better and more permanent value to all realty. There are no institutions which have done more good or brought more happiness and contentment to Tucson homes than have the loan and building associations.—Star.

The Los Angeles Times is giving its readers their money's worth, and more too. It has begun the distribution, free to its patrons, every Sunday, of a very handsome picture made by the Tonnesen Sisters of Chicago. "The Rose," the first of the series, distributed February 17th, has just been received by this office, and it is a picture which, framed, would be an ornament in any home. The Times proposes to do even more than this for its patrons. Beginning with the first week of March, a handsomely lithographed musical composition will be distributed free to its patrons every week.
